jointly published with inra paris the application of new production methods in the food industry genetic engineering in plants and animals as well as recent crises over food borne diseases have led consumers to a growing concern about science as an appropriate basis for developing sound agricultural policies this book presents the discussion of scientists and politicians in the framework of an oecd programme conference on how to restore public trust in the application of new scientific achievements concerning food production

the need for a scientifically literate citizenry one that is able to think critically and engage productively in the engineering design process has never been greater by raising engineering design to the same level as scientific inquiry the next generation science standards ngss have signaled their commitment to the integration of engineering design into the fabric of science education this call has raised many critical questions how well do these new standards represent what actually engineers do where do the deep connections among science and engineering practices lie to what extent can or even should science and engineering practices co exist in formal and informal educational spaces which of the core science concepts are best to leverage in the pursuit of coherent and compelling integration of engineering practices what science important content may be pushed aside this book tackles many of these tough questions head on all of the contributing authors consider the same core question given the rapidly changing landscape of science education including the elevated status of engineering design what are the best approaches to the effective

integration of the science and engineering practices they answered with rich descriptions of pioneering approaches critical insights and useful practical examples of how embodying a culture of interdisciplinarity and innovation can fuel the development of a scientifically literate citizenry this collection of work builds traversable bridges across diverse research communities and begins to break down long standing disciplinary silos that have historically often hamstrung well meaning efforts to bring research and practice from science and engineering together in meaningful and lasting ways

how do managers and entrepreneurs evaluate risk encourage creativity or manage change might a better grasp of science help the authors of this book suggest that there is real value in trying to connect science to business and that science is far too important just to be left to the scientists all of science is too large a prospect so the authors limit themselves to looking at disorder we must all learn to manage and control change and there is plenty of social technical and business change going on the authors suggest that a clearer understanding of entropy and the choices it presents will assist in that management of change or as they put it to manage disorder one needs to control the entropy vector this book is for scientists and engineers aspiring to business success and for business people interested in new approaches

science communication as a multidisciplinary field has developed remarkably in recent years it is now a distinct and exceedingly dynamic science that melds theoretical approaches with practical experience formerly well established theoretical models now seem out of step with the social reality of the sciences and the previously clear cut delineations and interacting domains between cultural fields have blurred communicating science in social contexts examines that shift which itself depicts a profound recomposition of knowledge fields activities and dissemination practices and the value accorded to science and technology communicating science in social contexts is the product of long term effort that would not have been possible without the research and expertise of the public communication of science and technology pcst network and the editors for nearly 20 years this informal

international network has been organizing events and forums for discussion of the public communication of science

these innovative resources use a thematic holistic hands on approach in teaching children about the natural world through creative art activities both books support the national science standards for meaningful integration of art and science concepts and processes each book contains 30 lessons and blackline masters

the public outcry for a return to moral education in our schools has raised more dust than it s dispelled building upon his provocative ideas in on becoming responsible michael pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community in such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves advocating approaches to moral education that avoid mindless indoctrination and timid relativism pritchard neither preaches nor hides behind abstractions he makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truthtelling lying making and keeping promises obedience character and responsibility he also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers the result is a rich and

insightful work that provides real hope for the future of our children and their moral education
